

Repair / Retrofit

REPAIR.

Breakdowns can create havoc with any production schedule. Rota Pack provides its' customers with quick response for service when downtime

is measured in lost production hours. Whether the repair requires part replacement or remanufacturing, our staff and service technicians are experienced in the most cost effective and efficient techniques that will ensure the quality and long-term repair of your machine.

REBUILD

Rebuilding begins with analysis. All machines are completely dismantled, cleaned, and inspected to determine the amount of damage and wear. After this inspection, a determination is made which parts need to be remanufactured or repaired. Then our staff of technicians literally remanufactures your machine to performance standards that you would expect from new.

RETROFIT

By definition, is the "upgrade of a machine" to furnish it with new or modified parts or equipment not available or considered necessary at the time of manufacture. Rota Packs'

staff of technicians utilize innovative technology and experience with applicable choices of the latest hardware and software designed especially for the rigorous industrial environment. Let our technicians explain the features and benefits of automating your retrofit.
